### **1. Product Introduction**

GENERATE NEGATIVE ION & OPTIONAL TO BE USED AS OXYGENATOR!

Ion-Oxy Quality Air System is an Innovative product designed to generate Negative Ions & Absorb Contaminated Droplets or Allergens and Dust from the air by Vortex Water Flow.

It could be used as Desktop-Light and Oxygenator by adding Optional Plants surrounding the device and at the same time to improve indoor air quality to improve Carbon Neutrality by bringing in more greens to our living environment.

**LET'S MAKE OUR EARTH A BETTER PLACE BY JUST STARTING AT HOME!**

### **2. Product appearance & accessories**

Main unit, Speed control switch, Air outlet, Vortex air-flow base, Vortex water sink, Adaptor, User manual.

### **3. Product specifications**

Product Name: IonOxy Quality Air Cleaner

Size: (H) 37 cm X (D) 27cm

Weight: about 1kg

Input voltage: DC 12V

Rated voltage: 110V

Material: ABS/PC

Model: IOAS-01

Colour: White

Place of production: Taiwan

#### **4. Emergency fixing method**

When the power cord is damaged, the manufacturer must have similar personnel to fix the failures or damage.

#### **5. Safety precautions**

When using electrical products, basic safety regulations should be strictly enforced to reduce the risk of fire, electric shock and personal injury.

The precautions include the following:

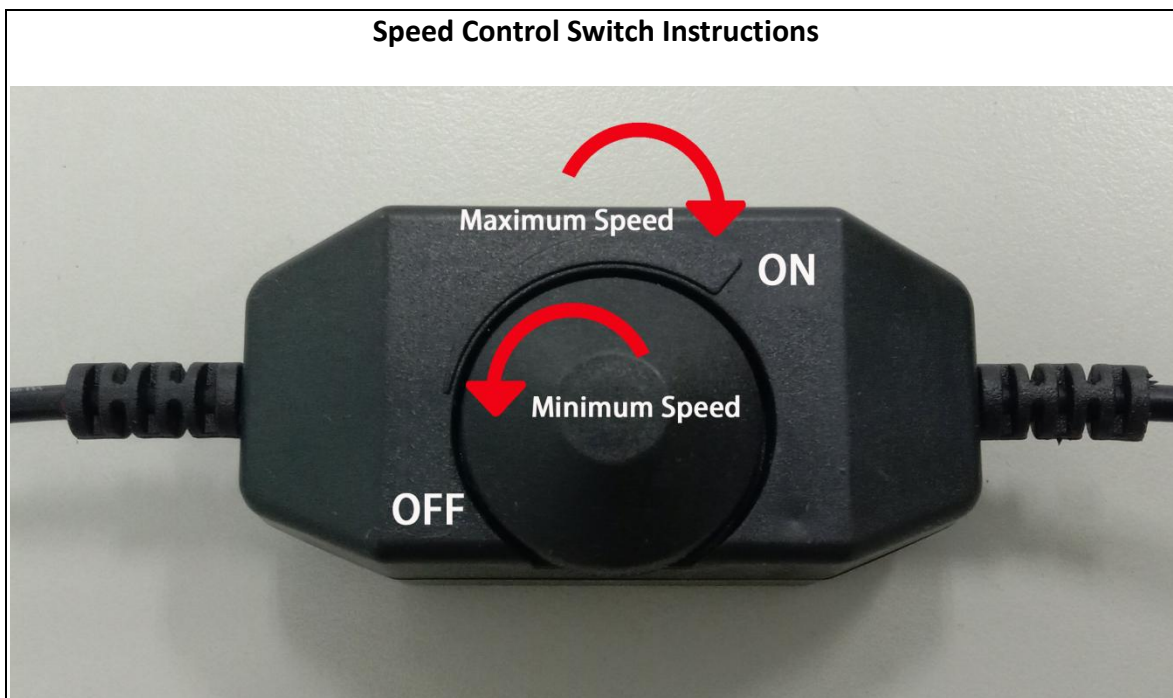

1. If the main unit cannot be used, be sure to turn off the power and pull out the power plug.
2. If you want to cut off the power, please remove it first, then unplug the power plug, and pull the power cord to unplug it.
3. Keep the main unit away from heat sources.
4. Placed in a dry place indoors for use, and cannot be used in places close to water.
5. The main unit is only suitable for indoor use.

#### **6. Installing the Main unit**

1. Before using the air purifier, please turn off the power and pull out the power plug.
2. Before installing the vortex base, please add water to the Air Purifier Basin in advance.
3. Turn on the switch, and the air outlet faces you.

Water level	
<p>Air Purifier Basin</p>  <p style="text-align: center;">Add 80% water</p>	<p><b>Precautions:</b> Please do not add to the brim.</p>

Connect the electronic controller installation steps	
	<p>The motor is connected to the Speed control switch (circled)</p>
	<p>Then connect the Speed control switch to the adaptor(circled)</p>
	<p>Lastly connect the adaptor to the socket.</p>

**7. Clean**

It is recommended to clean the air purifier basin and change the water at least once a week.
